MIDDLE EAST INFORMATION TECHNOLOGY, LEBANON (2007 to 2008)

Technical Manager

- Maintain strong relationships with customers for future enquiries and consultancies- Maintain strong relationships with product vendors- Build projects' Bill of Quantity (BOQ)- Develop high-level proof-of-concepts for customers- Implement and develop optimum solutions- Manage projects implementation.
- Cloud and Manage Services Market Development. I worked in a team at Citrix that was focused on the development of Managed and Cloud based Services. The team worked with existing and potential Service Providers across the lifecycle of Managed Services development, from envisioning the types of services that could be offered to how to take them to market.
- Managed Services Business
Developed a high level Business case analysis tool to enable the justification for the launch of new services. Users of the tool were able to provide inputs such as infrastructure investments, operational staffing levels and costs – and then provide estimates of the ramp up of new customers for the service, along with additional costs and incremental revenue realized from different service options. The output, in the form of an estimated 5 year return on investment, provided the opportunity for sales team to assist their Partners in building the first level business case to justify investment in the proposed new service to their board

WORLDNET , LEBANON (2003 to 2007)

Computer System Analysts

- Providing solutions (Microsoft Exchange 2003, Internet Security & Acceleration)
- Planning implementing and configuring a Microsoft Active Directory Service
- Installing and configuring McAfee URL and Spam Filtering SIG, SMG, Foundstone, McAfee ePo Orchestrator, Host Intrusion Prevention.
