

FARAH NOUREDDINE

Beirut, Lebanon | +961 81 841 659 | farah_nouredine@outlook.com | LinkedIn: [Farah Nouredine](#)

Monitoring and Evaluation Specialist with 4+ years of experience designing national M&E systems, leading mixed-methods research, and conducting advanced statistical analysis across large-scale public health programs. Skilled in causal analysis, data modelling, and translating complex datasets into actionable insights for policy and program design.

Professional Experience

Consultant | Global Health Team of Experts (GHTE)

Beirut, Lebanon

Jan 2025 – Present

- Designed the National Community Health Worker Registry and M&E framework by completing an impact analysis, registry design, and the performance monitoring dashboard for a project supported by UNICEF
- Conducted a national health information system (PHENICS) performance review to guide an enhancement project supported by the Japanese International Cooperation Agency (JICA); produced inception and progress reports, risk mitigation strategies, and implementation roadmaps

Monitoring & Evaluation Consultant | Ministry of Public Health (MoPH)

Beirut, Lebanon

March 2023 – Present

- Led M&E frameworks, data analytics, and performance reporting across national health programs (immunization, malnutrition, SRH, NCDs) for 300+ Primary Healthcare Centers (PHCCs), ensuring data accuracy, actionable insights, and accountability
- Developed 9 detailed logframes for national and donor-funded projects (Primary care subsidization protocol and benefit packages LPSP, Mental Health, SRH, Vaccination, Malnutrition...), monitoring progress and identifying gaps
- Designed and optimized national dashboards (SRH, malnutrition, EPI), collaborating with IT for integration
- Headed data restructuring, and modelling efforts, steered by national indicators and stakeholders' needs
- Generated quarterly and annual analytical reports (Joint Reporting Form JRF), Clinical Management of Rape (CMR), School Health and daily situation reports during emergencies, submitting them to Minister of Public Health and department director
- Established data-sharing and confidentiality protocols, including de-identified grievance tickets, to ensure compliance and secure access
- Set sampling design and methodologies for 15 departmental research initiatives
- Delivered training sessions to 100+ PHCC and NGO staff on M&E frameworks, indicators, and data-driven performance assessment tools
- Produced analytical briefs and dashboards and presented them at the LPSP retreat and executive meetings with WHO and UNICEF
- Drove PHENICS system improvement from solution recommendation to implementation (dose sequencing, malnutrition algorithms, SRH follow-ups), enhancing data quality and operational efficiency

Epidemiological Project Officer | INSERM – UMS 011

Paris, France

Feb 2022 – Aug 2022

- Conducted advanced statistical analysis on large scale health data in cancer and stroke identification methods (SNDS 220K+ records) using Cohen's Kappa, GEE, and ZINB models (*to be published soon*)

Education

MSc in Comparative Effectiveness Research, Paris Cité University (2021)

MPH in Methodology & Statistics in Epidemiology, Lebanese University & Paris-Saclay University (2018)

BSc in Laboratory Sciences, Lebanese University (2017)

Publication

June 2022

Elfekky M, Mostafa H, Shahi U, Shalaby E, Alharoun M, Elghaish M, et al. Causes of anterior cruciate ligament reconstruction failure: A meta-analysis. *J Musculoskelet Surg Res* 2022;6:193-9.
